### ULTIMATE LEAD REPLACEMENT

This is a NEW FORMULATION; specifically designed for vintage, classic and performance engines.

It has a more generous safety margin than its predecessor "Petrol Max".

It is specifically designed to work in conjunction with "Spyder Venom".

#### THE MIX RATIO IS NEW:

Add 1ml to every 1 litre of unleaded or premium unleaded fuel at each and every fill for maximum results. Repeat at each and every fill. If you add more than is optimally required you will do NO DAMAGE; it will only be a waste of product.

We are attempting to source some calibrated bottles in order to make usage more friendly and convenient. Stay tuned...

#### THE BEST NEWS IS THAT THE PRICE HAS NOT CHANGED!

The new product "Ultimate Lead Replacement" now treats approximately 300 litres of fuel whereas its predecessor "Petrol Max Lead Replacement" treated approximately 120 litres of fuel.

A 300ml bottle of "Ultimate Lead Replacement" is priced at \$25.00, same as the old product! Don't forget to ask about our NEW BULK PRICING for "Venom and Lead Packs"!

#### Ultimate Lead Replacement:

- Stops valve seat recession
- Increases horsepower
- Stops pinging
- Improves engine performance
- Lubricates carburettor needles and seats
- Stops fuel from ageing
- Is the ONLY lead replacement designed to work in conjunction with "Spyder Venom"
